LEAD SERVICE REPLACEMENT PLAN

INTRODUCTION

The Village of Libertyville has a population of 20,600 and encompasses 9.15 square miles. The Village receives its treated domestic water from the Central Lake County Joint Action Water Agency (CLC-JAWA) and delivers the water to its customers thru 129 miles of watermain. The Village uses approximately 800 million gallons of water annually and 2.2 million gallons daily. As of March 5, 2025, currently there are 7,380 service connections, in which 310 have been confirmed Lead and 576 remain unknown. ***Therefore this Lead Service Replacement Plan (LSRP) assumes that 886 services will need to be replaced.***

Breakdown of Each Lead Service Type (as of 3/31/2025):

Full Service Replacement Needed	191
Unknown both sides (potential full replacement)	248
Partial (Supplier Side replacement)	26
Partial (Customer Side replacement)	89
Half Unknown (Supplier = Copper)	95
Half Unknown (Customer = Copper)	210
Unclassified	27

For up to date quantities, please refer to the following weblink to visit the Village's public "Water Service Material Inventory":

<https://www.arcgis.com/apps/dashboards/29b7db18bb2d4ad48637fc7f50a4e912>

DEFINITIONS & ACRONYMS

AWWA	American Water Works Association
B-Box	Buffalo Box, the small water valve on a water service line
(The) Board	The Village of Libertyville Board of Trustees
(The) Code	The Village Libertyville Municipal Code (also "Village Code", "Municipal Code")
DIP	Ductile Iron Pipe
Engineering Design Standards	Refers to this document, the "Engineering Design & Construction Standards"
GIS	Geographic Information System
HDPE	High Density Poly Ethylene (pipe material)
IDOT	Illinois Department of Transportation
IEPA	Illinois Environmental Protection Agency
JULIE	J.U.L.I.E. (Joint Utility Locating Information for Excavators)
LCDOT	Lake County Division of Transportation
LSRP	"Lead Service Replacement Plan"
PCC	Portland Cement Concrete
PDF	Portable Document Format (electronic file format ".pdf")
PVC	Polyvinyl Chloride (pipe material)
RE	Resident Engineer
(The) Village	The Village of Libertyville
WM	Water Main. Not a private water service, but the public watermain, owned and maintained by the Village for water distribution.
Water Service	The pipe that connects the public watermain to a building. Typically, privately owned and maintained. Consists of two sides "Supplier side" and "Customer side" which are separated by a B-Box

PLAN HIGHLIGHTS

Replacement Schedule: The current mandate is for a water supplier to replace all lead services within their system over a 10-year period, starting in 2027. Therefore, the schedule will be to replace (on average) a total of 89 lead services annually.

Replacement Costs and Financing Options: It is currently proposed that the Village will assume the entire cost of replacing the lead service lines. The current estimated replacement costs per year are \$1,500,000. It is currently contemplated that these annual costs will be funded with a combination of a low interest loan from the IEPA and an adjustment of the utility's water rates for the entire customer base. Payment plans will be considered for any customers having financial difficulty to avoid shut-offs (discontinuation of service).

Prioritization of High-Risk Facilities: All high-risk facilities in the community are anticipated to already have either a ductile iron or copper water service.

Informing Public of Draft Plan: The Village will post the Initial Draft Plan on its website and solicit comments and questions.

Measures to Encourage Diversity in Workforce to Implement Plan: The Village will plan to include language in the eventual construction contracts to replace lead services to encourage a diverse workforce.

Procedure for Full Lead Service Replacements: For the anticipated "full lead" service replacements the Village will be utilizing the attached Hold Harmless Agreement to complete the installation of the lead water service on private property. It is envisioned at this time that a separate annual competitively bid construction contract will be necessary for the lead service replacements.

Procedure for Informing Customers Before a Lead Service Line Replacement: The Village utilizes the attached letter to inform customers in advance of a lead water service replacement (see [APPENDIX F: Lead Service Replacement: Pre-Construction Notification](#)).

LEAD SERVICE REPLACEMENT PLAN

REPLACEMENT SCHEDULE

The current mandate is for a water supplier to replace all lead services within their system over a 10-year period, starting in 2027. Therefore, the schedule will be to replace (on average) lead services that total 89 annually.

PHASE I – Known “Partial” Replacements

- Timeframe: Year 1 (2027)
- Goal: Replace lead services that are known to be a “partial” lead service.
- Quantity: Approximately 90 services
- Budget: Estimated \$1.0M available in FY27/28 for “Lead Service Replacements”, with potential additional funds from “Annual WM Replacement” (\$1.3M)
- Notes:
 - Some partial services might not apply, if they are located in an area that is already scheduled for full watermain replacement.
 - State Routes will be excluded from this phase (see Phases III and IV)

PHASE II – Village Streets

- Timeframe: Years 2-7 (2028 – 2033)
- Goal: Replace all lead services street-by-street on Village-owned roads
- Quantity: Approximately 630 services total (105 per year)
- Budget: Estimated \$2.3M available each year combining “Lead Service Replacements” and “Annual WM Replacement” programs
- Notes:
 - Streets are scored based on a range of criteria to determine prioritization
 - Some streets will have full watermain replacement, while some will have services replaced only, and this will depend on several factors.

PHASE III – State and County Routes

- Timeframe: Years 8-9 (2034 – 2035)
- Goal: Replace all lead services on IDOT or LCDOT roads
- Quantity: Approximately 100 services total (50 per year)
- Budget: Estimated \$2.3M available each year combining “Lead Service Replacements” and “Annual WM Replacement” programs
- Notes:
 - Milwaukee Avenue (IDOT) will exclude downtown (see Phase IV)

PHASE IV – Downtown Area

- Timeframe: Year 10 (2036)
- Goal: Complete new WM around downtown, switch services to new WM, and then abandon old WM underneath Milwaukee Avenue
- Quantity: Approximately 70 services total
- Budget: Estimated \$2.3M available combining “Lead Service Replacements” and “Annual WM Replacement” programs.

SCOPE AND LIMITS OF LSRP REPLACEMENTS

The Village LSRP will include service replacements that vary significantly in scope and situation. Below is a list of standards that generally apply to all service replacements, unless otherwise deemed appropriate by the Village Engineer on a case-by-case basis. All homeowners or residents should read the items below to understand the scope of LSRP improvements and the limits of the work that the Village's contractor will perform:

- **Replacement Limits Stop at Meter:** Service line replacements will end at the water meters. Any piping beyond the water meter is considered internal plumbing and is not eligible for replacement through the LSRP.
- **Replacement of Water Service Only:** Through the LSRP, only water services will be replaced. It is understood that sanitary sewer services are often in close proximity to water services. Unless clearly impacted by the Village's contractor, the Village will not replace or repair any sewer service or other utility line.
- **No Carpentry or Finished Work Included:** It is understood that replacement might affect finished basements. The Village will work with its contractor to minimize the disturbance to finished areas, but the Village will not replace any finishes affected by the water service replacement. This includes but is not limited to drywall, plaster, cabinets, carpet, flooring, etc. If impacted, repair of finished areas will be the sole responsibility of the homeowner / resident.
- **Grass Restoration:** It is understood that some amount of disturbance to grass or landscaped areas might occur, either on private property or within the public ROW, on the parkway in front of the home. The Village will attempt to restore all grass areas disturbed by construction, typically with seed and blanket. Due to unpredictable weather conditions, proper grass growth often requires residents to supplement with water as needed. By accepting a new water service line through the LSRP, the homeowner/resident acknowledges the likelihood of grass disturbance and ultimately accepts maintenance obligations of the grass area once the Village installs the seed and blanket (or similar restoration items).

ADMINISTRATIVE REQUIREMENTS

Because the work included in the LSRP will often include work on private property, there are required documents that will need to be in place before the work can occur. The list below describes each item in detail.

- **Hold Harmless:** This document represents the property owner accepting the LSRP work to occur on their private property and gives the Village (and their contractors/consultants) the right to perform work on private property. [APPENDIX G: Hold Harmless Agreement](#)
- **Refusal (Waiver):** *Only applicable if denying LSRP improvements.* If a resident/owner refuses to allow the Village on their property to perform LSRP work, then they will be asked to sign a waiver, which formalizes their denial of the improvements and confirms that the Village has notified them of their lead service and any associated risks. If an owner/resident refuses to sign the waiver, it will be documented in accordance with IEPA guidelines.
- **Plumbing Permit (Fixture Count Form):** The water service replacement requires a plumbing permit to be issued by the Village Building Department. The Village will handle the permitting process on the homeowner's behalf and waive all permitting fees (note that a meter upgrade fee might still be required case-by-case).

However, as part of the plumbing permit, the resident/owner will need to fill out and return a “***Fixture Count Form***” which counts all the different types of plumbing fixtures in the home. This is required by plumbing code to ensure that the water service and water meter are properly sized to support the plumbing demand of the building. [APPENDIX H: Plumbing Fixture Count Form](#)

APPENDIX A:

Lead Service Maps

The following maps show a snapshot of the Village's Water Service Material Inventory. Being included on a following map does not specifically mean that address is scheduled for replacement in a specific replacement plan phase. Each situation is different and will be scheduled according to the unique infrastructure situation on a case-by-case basis. These maps are provided for reference only and are subject to change. For an up-to-date map, please visit the

Village our public service material inventory website:

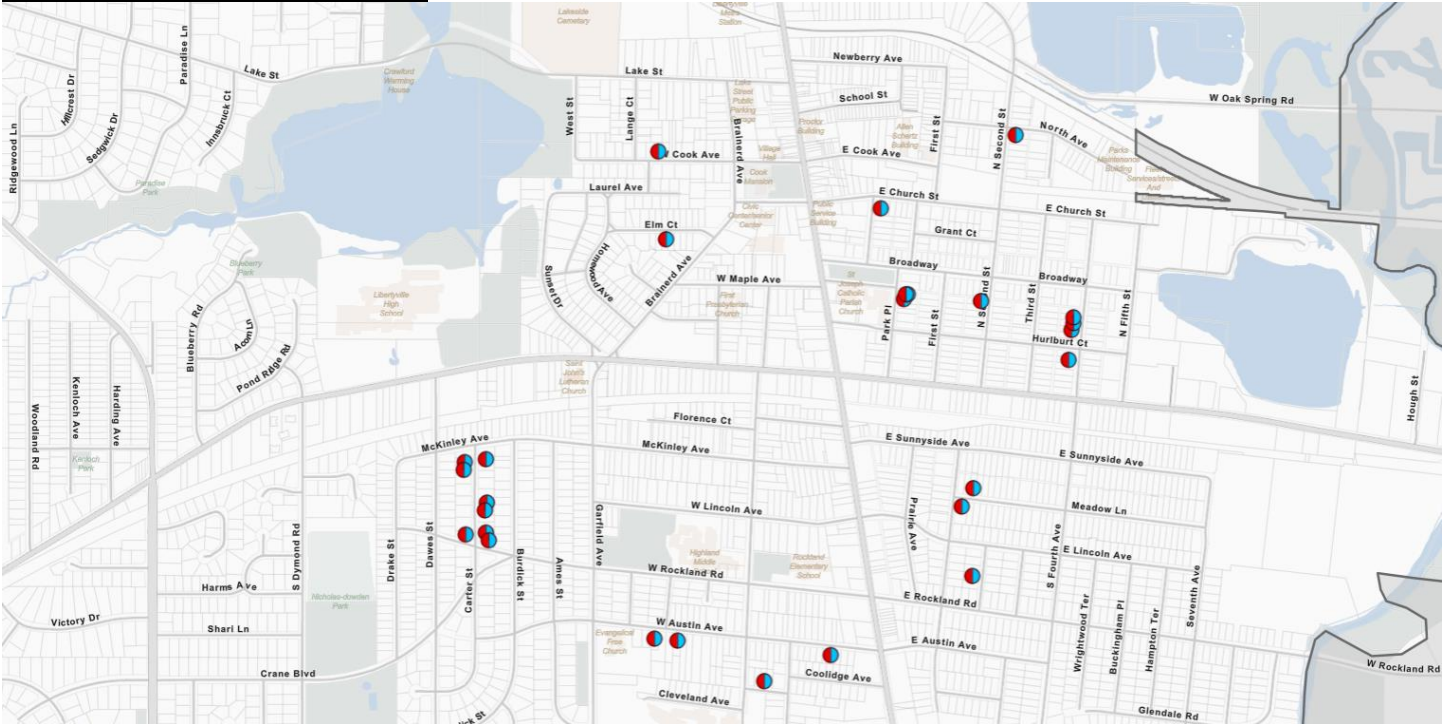

<https://www.arcgis.com/apps/dashboards/29b7db18bb2d4ad48637fc7f50a4e912>

APPENDIX C:

Water Service Material Inventory (Address List)

This is based on the Village GIS system and includes the best available information from a variety of data sources. If you question the accuracy of the listed data for your address, please contact Harrison Meyer at hmeyer@libertyville.com

This PDF was generated in April 2025. For up to date quantities, please refer to the following weblink to visit the Village's public "Water Service Material Inventory":
<https://www.arcgis.com/apps/dashboards/29b7db18bb2d4ad48637fc7f50a4e912>

WATER SERVICE MATERIAL INVENTORY

DATE: 4/7/2025

Abbreviation Legend

N = No	C = Copper	O = Other (Cast/Ductile Iron or Transite)	U = Unknown
Y = Yes	N/R = Not Required	P = Poly (PVC, HDPE, or PEX)	UNL = Unknown, Not Lead
WSR = Water System Record		PME = Previous Materials Evaluation	
CPC = Construction/Plumbing Code	VI(P) = Visual Inspection (Professional)	WMRR = Watermain Repair/Replacement	E(M) = Excavation (Mechanical)
	VI(C) = Visual Inspection (Customer)	SRR = Service Line Repair/Replacement	E(V) = Excavation (Vacuum)

Disclaimer: Please note that the data below has been extracted directly from the Village's current GIS database.
Village staff is consistently reviewing and assessing its lead service inventory, and will be publishing updates periodically.

Service Address		Is this a high-risk Facility or Area	Service Line Newly Identified Since Last Submitted Inventory	Year PWS-Owned Service Line was Installed	Year Customer Side Service Line was Installed	Source of Information Used for Service Line Identification	PWS-Owned Service Line Material	Customer Side Service Line Material	Classification for Entire Service Line	Was Galvanized Service Line Material ever downstream	Date Customer Notified of Lead Service Line	Was a Lead Service Line Previously Replaced at this Location	Date Lead Service Line Replaced	Material of Service Line Replacement	Has the customer refused access to the property	Date of customer waiver or IDPH notification if customer

APPENDIX D:

Lead Service Informational Letter

This letter is provided to residents who have a confirmed lead service, in order to notify them of their lead service and provide a brief summary of their options, as well as contact information for learning more or having their questions answered by Village staff.

LEAD WATER SERVICE NOTIFICATION

The Village of Libertyville is currently completing an inventory of all private water service pipe materials, in accordance with state and federal regulations. Due to either an inspection, excavation, submitted photo, or review of records, Village staff has identified the service pipe material of your property's private water service.

You are receiving this notice because it has been identified that your home is likely connected to a lead water service pipe. This notification is being provided to present you with information on lead services, as well as potential options that are available should you desire to replace your line.

Please note that this determination may have been made based on a variety of different information sources, with varying degrees of accuracy:

- If a staff member made the determination by viewing your service directly, it is considered confirmed.
- If the determination was made by records or photos, we would be happy to set up an in-home appointment with you to verify the material. Please call 847-362-3434 to schedule an appointment, if needed.
- If you don't know how the determination was made or would like to know more about the private water service at your property, please contact myself (Harrison Meyer) at 847-367-7054.

Background Information & Testing

Lead, a metal found in natural deposits, is harmful to human health, especially young children. Lead in water supplies usually occurs through corrosion of plumbing products containing lead. Lead water lines were commonly installed prior to World War II. In accordance with Illinois EPA requirements, the Village's domestic water supplier, CLCJAWA, includes a corrosion inhibitor, orthophosphate, in the water to coat pipes and fixtures with a thin film that reduces lead levels that may have otherwise leached into your water.

If you are concerned about lead levels within your water supply, you may wish to contact the Lake County Environmental Laboratory. The Lab is located at the County's Central Permit Facility at 500 W. Winchester Road in Libertyville, and they can provide you with water testing kits and additional information.

Water Service Replacements

The Village is currently developing a "Lead Service Replacement Program" that is expected to start in 2027 and take 10 years to complete. This program is currently anticipated to be fully funded by the Village, with a Village contractor replacing lead service lines. **No action is needed at this time to be included in this program.**

Should you wish to replace your lead water service sooner, please note that the Village does offer a voluntary cost-sharing program. Please refer to the attached "*Lead Water Services – Voluntary Service Replacement*" document for full details on the program, which offers residents reimbursements for some of the costs associated with the replacement. Reimbursement is for 50% of construction cost, up to \$2,500 (partial replacement to valve) or \$6,000 (full replacement to public main).

If you are considering replacement of your private water service, or have questions regarding the process, please contact me at hmeyer@libertyville.com or by phone at (847) 367-7054.

Please know that I am available to walk your through the process and answer any questions you have.

Sincerely,

Harrison Meyer, P.E.
Senior Project Engineer
Village of Libertyville

APPENDIX E:

Voluntary Lead Service Replacement Program

This document provides residents with guidance if they are interested in pursuing the Village's Voluntary Lead Service Replacement Program. In short, this voluntary program is a cost-sharing reimbursement program if residents do not wish to wait for the Village's lead service replacement program to reach them.

(This program is formalized by Admin Policy 16-01)

LEAD WATER SERVICES – VOLUNTARY SERVICE REPLACEMENT ADDITIONAL INFORMATION FOR PROPERTY OWNERS

This attachment is intended to provide more information for residents who are considering voluntary replacement of a water service made of lead and may wish to proceed in accordance with the terms of our Residential Lead Service Replacement Incentive Program (see attached Administrative Policy No. 16-01-REVISED 03/28/2023). Please keep in mind the following for your consideration:

- The first step which is necessary when proceeding with voluntary lead service replacement is an inspection by Village staff to confirm the presence of a lead service inside the home. To schedule the inspection, please call the Utilities Division, (847) 362-3434, any time Monday to Friday, 7am-3:30pm.
- As the property owner, it is your responsibility hire a contractor, and secure the Village permits.
- It is typically your responsibility to solicit quotes from qualified contractors. You must receive 3 quotes, and the reimbursement amount will be based on the lowest responsible quote.
- Some time is needed to process the permits, so it is recommended that you or your contractor apply for permits as soon as possible and allow time in your schedule for the permit process to be completed before your contractor begins.
- No permit fees will be charged when permits are issued in conjunction with the Residential Lead Service Replacement Incentive Program. Note that a meter upgrade fee and refundable deposit may apply. Please be advised that the reimbursement funding is conditioned on compliance with all typical permit requirements and Village standards for the installation and all necessary restoration.

Building Division Permit Issuance Requirements – (847) 918-2020

- Completed and Signed Application for Construction Permit
- Site Plan showing the location, size, and material of the new service coming into the building (This can be drawn on a copy of the Plat of Survey.)
- Note: See Engineering Division requirements below for additional site plan information needed.
- Indicate if a new meter is required and what size (up to 1 inch).
- Licensed Plumbing Contractor (Provide copies of the Plumbing License and State Registration and a Letter of Intent signed by the Licensee and notarized or stamped with the Corporate Seal)

Engineering Division Permit Issuance Requirements – (847) 918-2100

- Completed and Signed Application for Engineering Permit
- Site Plan shall indicate the location of the b-box (service valve), the remainder of the service, and the watermain.
- Certificate of Insurance from the Underground Contractor meeting the requirements outlined in the "Engineering Permit Conditions"
- Photos of the existing conditions of the public sidewalk and parkway in the area of proposed work.

For your information and convenience, we have included the names of underground contractors who are generally familiar with Libertyville's requirements and have the resources to work with you to complete this type of work. The Village has frequently worked with the following contractors (listed alphabetically); while we cannot directly endorse these contractors, our experience has generally shown favorable results. You may be able to find other contractor referrals or references from neighbors who have completed a water service replacement or similar underground projects.

VILLAGE OF LIBERTYVILLE

RESPONSIBILITY FOR RESIDENTIAL WATER SERVICES* BY LIBERTYVILLE MUNICIPAL CODE

* UP TO 2 INCHES IN DIAMETER

-  PRIVATELY OWNED
AND MAINTAINED
-  MAINTAINED BY
VILLAGE
(INCLUDING B-BOX)
Note: As part of a Village
Water Main Replacement
Project, this portion of the
water service is replaced
with a new service line at no
cost to the property owner.
However, under other
circumstances (e.g. when
desired by the property
owner or required by
Building Code), a
replacement/upgrade of the
entire water service is the
responsibility of the
property owner.

APPENDIX F:

Lead Service Replacement: Pre-Construction Notification

This document is provided to any water customer whose address has been identified to have their lead service replaced by the Village contractor in an upcoming project.

LEAD SERVICE REPLACEMENT: PRE-CONSTRUCTION NOTIFICATION

The Village of Libertyville has identified your address for a Lead Service Line Replacement (LSLR). A Village staff member or designated representative will be in contact with you to discuss the project specifics and answer any questions you might have. Below are some details that apply to all LSLRs for your reference:

HOLD HARMLESS AGREEMENT

This document is required whenever a Village contractor must enter private property to perform a lead service line replacement. The full name of the document is the "Private Lead Service Line Replacement License, Waiver of Liability and Hold Harmless Agreement". The Village can accept signed copies of this documents in physical or digital format.

PLUMBING FIXTURE COUNT FORM

The Village asks an owner/resident from each address to fill out a "Plumbing Fixture Count Form" to tally each of the plumbing fixtures that might be served by the water service to be replaced. This is part of the Village's standard permitting process for all water services as dictated by plumbing code and helps ensure that the service pipe and water meter are appropriately sized to accommodate the building they serve.

PLUMBING PERMIT

Village staff will process the plumbing permit on your behalf, waiving all application/inspection fees. Note that there still might be a meter fee in some circumstances, which would be communicated to you if applicable.

Please feel free to review the Villages "Lead Service Replacement Plan" on the Village website for more information about the scope and limitations of the Village's program to eliminate lead services.

Thank you again for your assistance with the Village's Lead Service Replacement Plan, and please know that we are here to answer any questions about the work to be performed at your address, or any of the information included in this notification letter. If you have any questions, please contact me at hmeyer@libertyville.com or by phone at (847) 367-7054.

Sincerely,

A handwritten signature in blue ink, appearing to read "Harrison Meyer".

Harrison Meyer, P.E.
Senior Project Engineer
Village of Libertyville

APPENDIX G:

Hold Harmless Agreement

This document is used whenever a Village contractor must enter private property to perform a lead service line replacement.

PRIVATE LEAD SERVICE LINE REPLACEMENT
LICENSE, WAIVER OF LIABILITY AND HOLD HARMLESS AGREEMENT

This License, Waiver of Liability and Hold Harmless Agreement ("**Agreement**") is made by **(OWNERNAME)** ("**Owner**"), the record title owner of a certain parcel of real estate located in the Village of Libertyville, Lake County, Illinois, commonly known as **(ADDRESSNAME)** ("**Property**").

A. The Property has been identified by the Village of Libertyville ("**Village**") as being served by a private lead service line or galvanized service line.

B. In accordance with Section 17.12 of the Illinois Lead Service Line Replacement and Notification Act, 415 ILCS 5/17.12, the Village is required to replace the lead service line at the Property in its entirety, including any portion of the service line running on private property and within any building located on the Property, at the first shut-off valve or 18 inches inside the building, whichever is shorter (collectively, the "**Work**").

In consideration of the Village's performance of the Work solely at the Village's cost and expense, the Owner hereby acknowledges and agrees as follows:

1. The Owner represents and warrants that it is the sole owner of the Property and has the right to authorize the Village to perform the Work.

2. The Owner hereby grants the Village, including, without limitation, its agents, employees and contractors, license to enter upon the Property to perform the Work, and to apply for and secure appropriate Village permit(s) for the Work on behalf of the Owner. Such permit(s) will be issued without any cost to the Owner and will be filed with Village records for the Property. This license allows the Village and its authorized agents and representatives to access the Property and enter and access all buildings and structures located thereon for the purpose of replacing the water service, performing interior plumbing modifications in support of the service line replacement, and restoring landscaping, driveways, walkways, sidewalks, or any other features that are disturbed during the completion of the Work. The Owner further grants permission to the Village and its authorized agents and representatives to access the Property for the purpose of performing all appropriate inspection of the Work.

3. Upon the final completion of the Work, including the final inspection, the Owner accepts and agrees that the service line installed on the Property and any interior plumbing modifications aside from the water meter will become the property of the Owner and the Owner will be responsible for any future repairs, maintenance, or replacement.

4. The Owner hereby assumes any and all liability arising from the completion, or the failure to complete, the Work. The Owner will indemnify, hold harmless, and defend the Village

5. THE OWNER ACKNOWLEDGES AND AGREES THAT THE VILLAGE IS PROVIDING THE WORK WITHOUT ANY WARRANTIES, WHETHER EXPRESS OR IMPLIED, AND THAT THE VILLAGE DOES NOT REPRESENT OR WARRANT THAT WORK WILL MEET ANY OR ALL OF OWNER'S PARTICULAR REQUIREMENTS, THAT AFTER THE WORK THE SERVICE LINE WILL OPERATE UNOBSTRUCTED OR WITHOUT ANY DEFECT OR PROBLEM.

6. THE OWNER WILL, AND DOES HEREBY, WAIVE, RELEASE, AND RELINQUISH ALL CLAIMS OF EVERY KIND, KNOWN AND UNKNOWN, PRESENT AND FUTURE, THAT OWNER MAY HAVE AGAINST THE VILLAGE AND ITS OFFICERS, AGENTS, SERVANTS, AND EMPLOYEES, ARISING OUT OF, CONNECTED WITH OR IN ANY WAY RELATED TO THE PROPERTY, THE SERVICE LINE, OR THE WORK.

7. This Agreement constitutes the entire agreement between the parties, and there are no representations, conditions, warranties, or collateral agreements, express or implied, statutory or otherwise, with respect to this Agreement other than contained herein.

IN WITNESS WHEREOF, the Owner has caused this Agreement to be executed on the date and year first above written.

OWNER

Date: _____

APPENDIX H:

Plumbing Fixture Count Form

This document is required by plumbing code to appropriately size a water service / water meter and is therefore needed for permitting a water service replacement.

PLUMBING FIXTURE COUNT FORM

The Village of Libertyville needs information regarding your home's existing number of plumbing fixtures in order to accurately assess the required water service pipe size per plumbing code.

Please fill out the current number of each different type of plumbing fixture currently in your home.

<u>Type of Plumbing Fixture</u>	<u>Count</u>
Combination Bathtub & Shower	
Bathtub (only)	
Shower (only)	
Toilet	
Sink (bathroom)	
Sink (kitchen)	
Sink (bar)	
Sink (service / slop / utility)	
Washing Machine	
Dishwasher	
Other (describe below):	

Address (*of plumbing fixture info*): _____

Completed By: _____

Date: _____

APPENDIX I:

Lead Service Replaced: Post-Construction Notification

This document is provided to any water customer who has recently had their lead service replaced by the Village contractor.

LEAD SERVICE REPLACED: POST-CONSTRUCTION NOTIFICATION

The Village of Libertyville has recently completed a full lead service line replacement at your address. This "Post-Construction Notification" covers some next steps and general information for your reference. Due to the disruption that occurs during a water service replacement, there might have been sediment dislodged in your internal plumbing system, which can temporarily increase the lead levels in your home's water.

FLUSHING

While the Village's contractor likely flushed your plumbing system after completing the water service replacement in accordance with standard Village procedures, we recommend you also flush your plumbing again as an added precaution before using water from your tap. Let water run from your kitchen tap (or any fixture used to ingest water) for at least 2 minutes before use.

FILTER PITCHER

The Village is providing you with a filter pitcher in conformance with state regulations. Instructions on how to setup and use the filter pitcher are also being provided to you. This filter removes lead from water, and generally lasts up to 6-months before it should be replaced (see included instructions for more details).

FOLLOW-UP TAP SAMPLE

If you wish, you may request that the Village collect a follow-up tap sample of your water. This sample should be taken 3-months to 6-months after the lead service line replacement. Call our Utilities Division at 847-362-3434 to schedule a follow-up tap sample with the Village.

Thank you again for your assistance with the Village's Lead Replacement Plan, and please know that we are here to answer any questions about the work that was just performed at your address, or any of the information included in this notification letter. If you have any questions, please contact me at hmeyer@libertyville.com or by phone at (847) 367-7054.

Sincerely,

A handwritten signature in blue ink, appearing to read "Harrison Meyer".

Harrison Meyer, P.E.
Senior Project Engineer
Village of Libertyville

Please see the reverse side of this letter for state-mandated information regarding lead service lines

The following information is required to be provided to all residents with work on a lead service line according to the most current state regulations:

A) IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER. The Village of Libertyville has found elevated levels of lead in drinking water in some homes/buildings. Lead can cause serious health problems, especially for pregnant women and young children. Please read this information closely to see what you can do to reduce lead in your drinking water.

B) Health Effects of Lead. Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

C) Sources of Lead. Lead, a metal found in natural deposits, is harmful to human health. The most common exposure to lead is swallowing or breathing in lead paint chips and dust. However, lead in drinking water can also be a source of lead exposure. In the past, lead was used in some water service lines and household plumbing materials. Lead in water usually occurs through corrosion of plumbing products containing lead; however, disruption (construction or maintenance) of lead service lines may also temporarily increase lead levels in the water supply.

D) What you can do to reduce lead exposure in drinking water:

- *Run your water to flush out lead.*
 - If you do not have a lead service line, running the water for 1 – 2 minutes at the kitchen tap should clear the lead from your household plumbing to the kitchen tap.
 - If you do have a lead service line, flushing times can vary based on the length of your lead service line and the plumbing configuration in your home. The length of lead service lines varies considerably. Flushing for at least 3 – 5 minutes is recommended.
- *Use cold water for drinking, cooking, and preparing baby formula.* Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula.
- *Look for alternative sources or treatment of water.* You may want to consider purchasing bottled water or a water filter that is certified to remove "total lead".
- *Clean and remove any debris from faucet aerators on a regular basis.*
- *Do not boil water to remove lead. Boiling water will not reduce lead.*
- *Purchase lead-free faucets and plumbing components.*
- *If concerned that your child may have ingested lead, you can have their blood tested for lead levels.*

E) If you are receiving this letter, it is because the Village has just completely replaced your lead service line. Due to the disruption that occurs during a water service replacement, there might have been sediment dislodged in your internal plumbing system, which can temporarily increase the lead levels in your home's water. Flushing out your plumbing system is highly recommended as described in item "D" above. The Village is also providing you with a pitcher that filters lead from water as an extra precaution, in accordance with state regulations.

F) For more information, call 847-362-3434 or visit our website at <https://www.libertyville.com/1197/Lead-Water-Service-Lines>. For more information on reducing lead exposure around your home/building and the health effects of lead, visit USEPA's Web site at www.epa.gov/lead or contact your health care provider.

G) Information on Lead Service Lines. The Village still has properties remaining with lead service lines. The Village's current inventory of water service line materials can be found at the website listed above in item "F". Also at this website, there are materials which describe the Village's "Lead Service Replacement Plan" and the Village's voluntary "Lead Service Replacement Reimbursement Program". The Village will be completely replacing lead service lines for all properties as part of the "Lead Service Replacement Plan"

H) Water Sample Testing. The Lake County Health Department offers water sample testing at their location here in Libertyville at 500 W Winchester Rd, Libertyville, IL 60048 (Central Permit Facility building). Call the Health Department at 847-377-8020 for more information and pricing.

I) Lead in Plumbing Fixtures. The lead service line that was just replaced from the public watermain to the water meter within your home is not the only potential source of lead in home drinking water. In the past, lead materials were used in some plumbing fixture products. We encourage all residents to replace old plumbing fixtures like faucets with modern low-lead or lead-free products.
